## Silver Use By MD's and other Medical Professionals

Add This Page To Favorites

Why is the FDA, the TGA and many other govt agencies world wide disagreeing with their front line doctors,, is there any truth in the FDA claims that silver is Dangerous,? why dont the Top Russian Scientist agree with the FDA? is it a conspiracy? or are we just being paranoid,,our Govts wouldnt lie to us? would they? Were all those doctors who prescribed silver products and the scientists who conducted the studies liars, scammers and/or quacks? Or could it be that mainstream medicine and its advocates are attacking colloidal silver because it really does represent a threat to the hundreds of billions in profits from patented drugs?

**Here are just some of the Medics and Scientists who feel differently, read through and make up your own mind....**

There is a great deal of information available on the web concerning the "pre-FDA" uses of silver by practicing medical doctors. While it is certainly true that silver was considered a powerful medicine before the advent of antibiotics, this article endeavours to focus on the present day medical applications of silver, and current news regarding developments. The sections below delve into the practicing and research world of modern medical science, and clearly demonstrate that the prevalent belief that silver is simply a snake-oil cure peddled by unscrupulous scam artists is: Simply not true!

### Colloidal Silver Has Mainstream Medicine Singing the Blues

*Tony M. Isaacs January 16, 2008 The recent widespread mainstream media coverage of the "blue man" Paul Karason and his rare skin condition known as Argyria is the latest in a series of largely misleading and sensationalized scare stories about the dangers of colloidal silver turning a person's skin blue.*

*Although this latest story did not appear to originate from mainstream medicine or the FDA, there is little doubt that they have welcomed it with open arms and have been quick to trot out "medical experts" and past FDA warnings to help "sing the blues" about colloidal silver. The truth is that mainstream medicine has a very good reason to cry long and loud about colloidal silver, because it does represent a very real danger – a danger to the huge profits of the pharmaceutical industry's patented antibiotics. [Source](#)*

### Antelman MS. - Methods of using electron active compounds for managing cancer

Thirty Central American female patients diagnosed with breast cancer, age 32 to 52, were treated with with Ag404 (Injectable Tetrasil ). This polyvalent silver oxide, also known as tetrasilver textroxide, was administered intravenously to achieve a blood plasma concentration of 10PPM.

After 30 days following the initial injections, all 30 individuals tested negative for cancer. [Source](#)

How does it KILL viruses**These videos play in Firefox browser****Dr. Robert O. Becker - Researching Medical Doctor**

Dr. Robert O. Becker, a researching orthopedic medical doctor, was one of the early pioneers of silver experimentation for medical applications. Dr. Becker re-discovered the broad-spectrum antibacterial properties of silver, and clinically demonstrated both the tissue healing properties of silver ions and the antimicrobial properties of silver. By surgically inserting silver electrodes, and applying a small amount of electrical current, Dr. Becker proved his famous "current of injury" theory and demonstrated the incredible healing properties of silver by successfully mending infected non-union bone fractures.

Dr. Becker's in-vitro experimentation testing silver ions against cancer cells and subsequent observations documenting beneficial morphogenic changes to living cells has paved the way to the eventual "discovery" of advanced medical technologies involving silver iontophoresis and possibly even human regeneration.

**Dr. Becker's Research: Read "The Body Electric" & "Cross Currents" - Robert O. Becker**

Published Journal Abstracts:

Induced Cell Differentiation: 2002

Silver Anode Treatment of Chronic Osteomyelitis: 1981

Silver Polymethyl Methacrylate Antibacterial Bone Cement: 1979

Treatment of Orthopaedic Infections with Electrically Generated Silver Ions: 1978

**Effect of Anodally Generated Silver Ions on Fibrosarcoma Cells**

Robert O. Becker?

Becker Biomagnetics Star Route Lowville, NY, 13367

The use and potential side effects of electrical parameters for possible tumor control are discussed. The conversion of tumor cells to normal cells by regenerating tissues is proposed as a possible alternate method. Preliminary observations indicating that anodally generated silver ions may have a similar action on human fibrosarcoma tumor cells in culture are reported [Source](#).

**Dr. Becker Robert O. Quote, The Body Electric:**

"...We were overjoyed to see that the silver hadn't corroded and the wound looked great. Carefully I took a bacterial culture and applied a new silver nylon dressing...

"..by then all of our bacterial cultures were sterile -- all five kinds had been killed. The soft healing tissue, called granulation tissue, was spreading out and covering the bone. In two weeks, the whole base of the wound, which had over eight square inches of raw bone, was covered with this friendly pink carpet. The skin was beginning to grow in, too, so we could forget about the grafts we thought we'd need to do...

"By mid-1978 we'd successfully treated fourteen osteomyelitis patients with the positive silver mesh wire..."

Dr Robert O. BECKER Silver Iontophoresis --- Healing & Regeneration

**CS and Child Birth**

*Bacteria, fungi and viruses cause a great majority of minor illnesses we have today from runny noses or colds to minor food poisoning. We catch many of these illnesses from being exposed to people as we go through our daily routines. At the end of the day, a quick spritz of EGCS into the nose and mouth could stop dangerous germs you've picked up at work, school, shopping, etc., from doing any damage.*

[The Rebellion of Germs Against Antibiotics](#) This is a good read:)

Dr. Bart Flick of Argentum Medical LLC, another early pioneer in silver medical research, invented FDA approved Silverlon wound contact dressing. Dr. Flick, as a practicing medical doctor, has been involved with over 300 wound treatment cases utilizing silver nylon as a wound dressing, with conditions ranging from chemical burns, to post operative wounds, to brown recluse spider bites, and even diabetic ulcers.

**Dr. Bart Flick Quote:**

"The antimicrobial activity of silver rests upon the interaction of silver with the bacteria's cellular membrane. This interaction can occur through the presence of a silver ion in solution or the release of silver in an ionic moiety directly from the surface of metallic silver when a bacterial cell membrane comes in direct contact with the metallic surface."

*In October 1996, the FDA proposed to ban the use of colloidal silver or silver salts in over-the-counter products [11]. A Final Rule banning such use was issued on August 17, 1999 and became effective September 16th. The rule applies to any nonprescription colloidal silver or silver salt product claimed to be effective in preventing or treating any disease.*

**Quackwatch**

**According to the National Institute of Health**

**Scientific Evidence**

Reviews of the scientific literature on colloidal silver products have concluded that:

Silver has no known function in the body

Claims made about the effectiveness of colloidal silver products for numerous diseases are unsupported scientifically

Colloidal silver products can have serious side effects

Laboratory analysis has shown that the amounts of silver in supplements vary greatly, which can pose risks to the consumer.

**BUT**

**Some countries completely disagree with the FDA**

The Environmental Protection Agency's Poison Control Center reports no toxicity listing for Colloidal Silver; it is therefore considered harmless in any concentration. However, all of the silver salts are identified as toxic, although the only adverse effect noted is Argyria. **Therefore the concern is with silver salts and compounds, not colloidal silver.**

**Ask your self this**

**Were all those doctors who prescribed silver products and the scientists who conducted the studies liars, scammers and/or quacks? Or could it be that mainstream medicine and its advocates are attacking colloidal silver because it really does represent a threat to the hundreds of billions in profits from patented drugs?**

**[View now](#)**

**[Are the Vaxcines safe?](#)**

**[View now](#)**

**[Is it a Conspiracy?](#)**

**Consider these interesting facts:**

The Greeks used silver vessels to keep water and other liquids fresh. The writings of Herodotus, the Greek philosopher and historian, date the use of silver to before the birth of Christ.

The Roman Empire stored wine in silver urns to prevent spoilage.

The use of silver is mentioned in ancient Egyptian writings.

In the Middle Ages, silverware protected the wealthy from the full brunt of the plague.

Before the advent of modern germicides and antibiotics, it was known that disease-causing pathogens could not survive in the presence of silver. Consequently, silver was used in dishware, drinking vessels and eating utensils.

In particular, the wealthy stored and ate their food from silver vessels to keep bacteria from growing.

The Chinese emperors and their courts ate with silver chopsticks.

The Druids have left evidence of their use of silver.

Settlers in the Australian outback suspend silverware in their water tanks to retard spoilage.

Pioneers trekking across the American West found that if they placed silver or copper coins in their casks of drinking water, it kept the water safe from bacteria, algae, etc.

All along the frontier, silver dollars were put in milk to keep it fresh. Some of us remember our grandparents doing the same.

*FDA approves experimental use of antiviral drug for Ebola, but still won't allow testing with colloidal silver or Echinacea*

*So far, the FDA has approved ZMapp for Ebola treatment and are now approving Chimerix, but why isn't colloidal silver being looked at? Why aren't antiviral herbal extracts being shipped immediately? Instead, regulatory agencies attack these immune-system-building approaches almost as if their bureaucracy is just a mafia gang working for the drug company cartels [Learn more:](#)*

*The New York Times published an article explaining that the FDA had ["issued warnings over Ebola cures."](#) This article specifically named Dr. Rima Laibow for asserting that nano silver can kill Ebola.*

[Us Air Force Laboratory findings](#)

Silver leaf was used to combat infection in wounds sustained by troops during World War I.

Prior to the introduction of antibiotics, Colloidal Silver was used widely in hospitals and has been known as a bactericide for at least 1200 years.

In the early 1800s, doctors used silver sutures in surgical wounds with very successful results.

In Ayurvedic medicine, silver is used in small amounts as a tonic, elixir or rejuvenative agent for patients debilitated by age or disease.

*In 1969, the Surgeon General of the United States declared, "We can close the book on infectious diseases caused by bacteria."*

**Dr. Issam I. Raad, MD - The University of Texas, MD Anderson Cancer Center**

Infectious Diseases, Infection Control and Employee Health: Internal Medicine

Dr. Issam Raad focuses on research specializing in device-related infections, molecular microbiology in evaluating the epidemiology of multidrug-resistant bacterial and fungal infections and in diagnosing invasive fungal infections, and the evaluation of novel antimicrobial agents in the prevention and treatment of cancer-related infections.

#### **Dr. Raad Quote:**

"...A novel antiseptic silver iontophoretic catheter that produces silver ions over long periods has also been developed. The ions are generated by a low electrical current produced by a double helical wire structure around the catheter subcutaneous segment. This catheter has been shown to be efficacious in vitro and in vivo in preventing catheter colonization. This technology is remarkable because, unlike catheters coated with antimicrobial agents, it offers long-term protection and less potential for development of resistant organisms..."

Silver iontophoretic catheter: a prototype of a long-term antiinfective vascular access device.

Raad I, Hachem R, Zermeno A, Stephens LC, Bodey GP.

Department of Medical Specialties, University of Texas M. D. Anderson Cancer Center, Houston 77030, USA.

A silver iontophoretic catheter (SIC) was developed consisting of two electrically charged parallel silver wires helically wrapped around the proximal segment of a vascular catheter. In vitro and in vivo activities of this catheter

were compared with those of an aseptic catheter coated with chlorhexidine and silver sulfadiazine (CH/SS). The SIC demonstrated broad-spectrum in vitro inhibitory activity against bacteria and *Candida albicans* comparable to that of the CH/SS-coated catheter. The durability of activity was determined by incubating catheters in serum at 37 degrees C for various time intervals. After 30 days, the antimicrobial activity of the SIC did not change significantly, while that of the CH/SS-coated catheter was reduced to a suboptimal level. In a rabbit model, the SIC was safe and significantly more efficacious than the CH/SS-coated catheter in preventing colonization with *Staphylococcus aureus* ( $P < .05$ ). The SIC has broad-spectrum inhibitory activity of long durability and is highly efficacious in preventing colonization in vivo. [Abstract on Silver Iontophoresis: Silver iontophoretic catheter: a prototype of a long-term antiinfective vascular access device.](#)

*Even Hospitals have become unsafe because staphylococcus (staph) and streptococcus (strep) flourish in that environment. They've become resistant to every antibiotic except one vancomycin. Infectious disease specialist, Dr. Thomas Beam told Newsweek magazine, "We know at some point staph and strep will become resistant to vancomycin." We've become complacent about diseases such as staph and strep and should be reminded that before antibiotics were available almost 80% of hospital patients that contracted those diseases died. The Muppets creator, Jim Henson, was killed in 1990 by strep A, a very dangerous form of bacteria. [Source](#)*

#### **[Dr. Eileen M. Wright , M.D., F.A.C.E.P - Great Smokies Medical Center, Asheville NC](#)**

Doctor Eileen M. Wright graduated from The University of South Florida College of Medicine in 1975, and served for two years in General Surgery in the US Navy Medical Corps. She served as assistant professor, and, later, assistant clinical professor in Surgery, Division of Emergency Medicine at the University of Florida in Gainesville.

Dr. Wright suggests the use of a high quality colloidal silver as a part of a treatment protocol for infections:

"...At the very first sign of any symptoms continue taking the above products and also take one teaspoon of Argentyn-23 every twenty minutes for 4 to 6 doses, then 1 tsp. three times daily."

Read the entire article: [Sars Prevention](#)

The City of Hope's Helford Clinical Research Hospital, in Duarte, California ( Completed in 2004 ) One of the most advanced research & treatment hospitals in the United States, The Helford Clinical Research Hospital will house the nation's largest bone marrow transplant facility. Among its high tech state-of-the-art arsenal is a silver and zeolite powder coating used specifically to harness the antimicrobial power of the silver ion. The antimicrobial powder coating ( AgION ) is applied to steel machinery and equipment, and has EPA and FDA approval for use in a variety of applications.

The zeolite acts as a silver ion pump, and helps to maintain a sterile environment and prevent the proliferation of microbes. AgION is a surface treatment solution, and is especially ideal for equipment used in the medical field and the food industry.

"The Helford Clinical Research Hospital is a reflection of City of Hope's philosophy of fusing leading-edge technology and research with compassionate care of the soul,"

- Gil N. Schwartzberg, president and chief executive officer of City of Hope

#### **[The Resurgence of Silver in Medicine](#)**

The return of silver to conventional medicine began in the 1970s. The late Dr. Carl Moyer, chairman of Washington University's Department of Surgery, received a grant to develop better methods of treatment for burn victims. Dr. Margraf, as the chief biochemist, worked with Dr. Moyer and other surgeons to find an antiseptic strong enough, yet

safe to use over large areas of the body. Dr. Margraf investigated 22 antiseptic compounds and found drawbacks in all of them.

Reviewing earlier medical literature, Dr. Margraf found continual references to the use of silver. However, since concentrated silver nitrate is both corrosive and painful, he diluted the silver to a .5 percent solution and found that it killed invasive burn bacteria and permitted wounds to heal. Importantly, resistant strains did not appear

Silver sulphadiazine (Silvadene, Marion Laboratories) is now used in 70 percent of burn centers in America. Discovered by Dr. Charles Fox of Columbia University, sulphadiazine has also been successful in treating cholera, malaria and syphilis. It also stops the herpes virus, which is responsible for cold sores, shingles and worse.

Because of the research showing colloidal silver's superior performance in fighting microbes, it has attracted the attention of leading scientists and medical researchers throughout the world. Its benefits are now stirring new interest as 50 prominent doctors are currently researching the efficacy and applications of colloidal silver in human health. As a result, many interesting studies have emerged.

According to experts, no microorganism ever tested has been able to stay alive for more than six minutes when exposed directly to colloidal silver.

**Science Digest cites colloidal silver as** "...a wonder of modern medicine," and further states "Antibiotics kill perhaps a half dozen different disease organisms, but silver kills hundreds. Resistant strains fail to develop. Moreover, silver is virtually non-toxic. Colloidal silver, used as an anti-microbial agent, will not create super bugs as antibiotics do."

**Alfred Searle**, founder of the giant Searle Pharmaceuticals (now Monsanto) stated, "Applying colloidal silver to human subjects has been done in a large number of cases with astonishingly successful results. For internal administration ... it has the advantage being rapidly fatal to pathogens without toxic action on its host. It is quite stable." Further information indicates that Colloidal Silver does not cause harmful interactions with other medications or topical treatments.

**In laboratory tests with colloidal silver**, bacteria, viruses, and fungal organisms are killed within minutes of contact. Larry C. Ford, M.D. of the Department of Obstetrics and Gynecology, UCLA School of Medicine, Centre For The Health Sciences reported in November 1, 1988, "I tested them (the silver solutions) using standard anti-microbial tests for disinfectants. The silver solutions were anti-bacterial for concentrations of 105 organisms per ml of Streptococcus Pyogenes, Staphylococcus Aureus, Neisseria Gonorrhea, Gardnerella Vaginalis, Salmonella Typhi and other enteric pathogens, and fungicidal for Candida Albicans, Candida Globata and M. Furfur."

*Why do mainstream medicine apologists attack colloidal silver, When so many of their colleuges use it???*  
*Prior to the advent of patentable and more profitable antibiotics, medicines containing silver were the most widely prescribed infection fighters by doctors and there were no fewer than 34 different approved prescription and over the counter medications with silver particles.*

### Professional Quotes Regarding Colloidal Silver

"... in this eye-opening research, silver is emerging as a wonder of modern medicine... perhaps, it soon will be recognized as: OUR MIGHTIEST GERM FIGHTER. For example, even the most powerful pharmaceutical antibiotics are effective against only a small number of microorganisms, and then only until drug-resistant strains develop. Yet, research at Washington University School of Medicine ... has shown that silver is bactericidal to nearly 650 different disease-causing organisms, and that silver-resistant bacteria strains do not develop." ---Science Digest

"It killed not only the HIV virus, but every virus that was tested in the lab." ---U.C.L.A. Medical Center

"When silver was present, the cancer cell de-differentiated and the body was restored." Dr. Gary Smith

"...major enhancement of both the rate and competency of the healing process...the germ-killing of silver has been

known for some time...the Soviets use silver ions to sterilize recycled water aboard their space stations... It kills even antibiotic strains, and also works on fungus infections... It stimulates bone-forming cells, cures the most common stubborn infections of all kinds of bacteria, and stimulates healing in the skin and other soft tissues." Robert O. Becker, M.D. –author of The Body Electric

"... studies showed the spectrum of organisms susceptible to electrically generated silver ions was wide and .... compared favorably with...other antibiotics" --- J.A. Spadaro, Ph.D.

"I know of no microbe that is not killed in laboratory experiments in six minutes." Dr. Henry Crooks

"...the colloidal metals... are remarkable for their beneficial action in infective states."--- Dr. Hirschberg, John Hopkins Hospital

"To primitive life forms...silver is as toxic as the most powerful chemical disinfectants and this, coupled with its relative harmlessness to animate life (i.e. mammals), gives it great potential as a disinfectant." N.R. Thompson – Runcorn Health Laboratory in England

*According to reports from the Army Medical records, (from the 1918 Spanish Flu, H1N1 epidemic) 24% of the people died from the virus and 76% died from a secondary bacterial infection that produced pneumonia in the lungs. There is a high probability that the swine flu will have similar death rates, and if this is the case, then preventing and treating the secondary bacterial infection will be as important if not more important. [Source](#)*

"The medicine department of obstetrics and gynecology at UCLA conducted tests in 1988 regarding the use of silver solutions as disinfectants. Anti-microbial and anti-bacterial effects were demonstrated in 10/5 concentrations per milliliter of the following: neisseria gonorrhea, gardurella vaginalis, streptococcus pyogenes, staphylococcus aureus, candida albicans, candida eolobata, m. furfur, salmonella typhi." Larry C. Ford, M.D., UCLA Department of Obstetrics and Gynecology, UCLA School of Medicine, November, 1, 1988

#### [AIDS Study](#)

"Eight people recover from the AIDS virus in a scientifically documented study. An additional seven AIDS patients recover as verified by anecdotal reports". Dr. M. Paul Farber, M.P. N.D., Ph.D., D.C. Author of the "Micro Silver Bullet TM" 4th Edition, November 1996 ISBN 1-87742-00 X Pages XIII & XVI.

#### [Lyme Disease](#)

"Borrelia burgdorferi and hermsi, organisms associated with causing the symptoms of Lyme Disease, were tested at the Department of Health and Human Services, Rocky Mountain Laboratories and Fox Chase Cancer Center, respectively, in 1995; in the Rocky Mountain Labs study, it was demonstrated that no live spirochetes of either borrelia burgdorferi [B310 orhermsi (HS-1)] survived after 24 hours of exposure to colloidal silver in concentrations of 15 ppm and 150 ppm." Schuan, Tom, Ph.D., Burgdorfer, Willy Ph.D. Department of Health and Human Services, National Institutes of Health, Rocky Mountain Laboratories, January, 13, 1995.

#### [Cancer Research](#)

Research by Dr. Robert O. Becker, and others indicated that laboratory tests conducted reverted cancer cells back to normal (not kill them but return them to normal). Other observations made such as a correlation between silver deficiency and illness or proper immune system functioning, burns, soft tissue and bone repair acceleration, and the formation of cells that appear to be able to repair virtually any part of the body. Reduction of inflammation and the antibacterial, germicidal, astringent, antibiotic attributes so far observed are yet to be fully understood. The Body Electric, Dr. Robert O. Becker ISBN 0688069711 Quill, New York or William Morrow & Company

**C.E. A. MacLeod reports colloidal silver being used with marked success in the following cases:** "Septic and follicular tonsillitis, Vincent's angina, phlyctenular conjunctivitis, gonorrheal conjunctivitis, spring catarrh, impetigo (contagious acne of face and body), septic ulcer of legs, ringworm, soft sores, suppurative appendicitis after operation (the wounds cleaned rapidly), pustular eczema of scalp and pubes, chronic eczema of meatus of ear with recurrent boils, chronic suppuration in otitis media, and bromidrosis of feet. By injection: gonorrhoea and chronic cystitis (local), boils, epididymitis." Lancet, Feb. 3, 1912 p. 83

**Some researchers, such as Dr. Leonard Keene Hirschberg, A.M., M.D. of Johns Hopkins**, believe that the potential of colloidal silver is just beginning to be discovered. Unlike antibiotics, which are specific only to bacteria, Colloidal Silver disables certain enzymes needed by anaerobic bacteria, viruses, yeasts, and fungus resulting in the destruction of these enzymes. Further indication is that these bacteria cannot develop a resistance to silver, as they do with antibiotics, because silver attacks their food source, rather than them directly

**Insofar as scientific studies**, last year it was reported that researchers in Hungary found specific silver receptors on human tissue - an indication that silver plays an important role in human health. A joint study between the University of Texas and Mexico University published in the Journal of Nanotechnology which showed that silver nanoparticles of sizes 1-10nm attached to HIV-1 and prevented the virus from bonding to host cells.

**A study conducted by the Department of Microbiology at Kyungpook National University in Daegu**, Korea, and published in the prestigious Journal of Microbiology and Biotechnology, found that nano-silver was comparable in effectiveness to Amphotericin B, one of the most powerful prescription antifungal drugs known to man, which is often used intravenously to cure serious systemic fungal infections, and was found to be superior to the well-known anti-fungal drug fluconazole (popularly known as Diflucan).

**And then there is the recently completed study conducted by researchers** from the Washington University School of Medicine and the University of Akron, Ohio, and presented at the 105th International Conference of the American Thoracic Society, where researchers infected a group of mice with the bacteria *Pseudomona aeruginosa*, a common cause of bacterial pneumonia in humans, especially those on ventilators, those with cystic fibrosis or those with compromised immune systems. All the mice which inhaled aerosolized nanoparticles known as silver silver carbene complexes (SCCs), had significantly lower concentrations of bacteria in their lungs than mice inhaling placebo nanoparticles. Most significantly, none of the mice in the SCC group died, while all the mice in the control group did.

**Virologist Dr. Gordon Pedersen Recommends Colloidal Silver for Maximum Protection Against Swine Flu** In spite of an FDA crackdown on companies touting colloidal silver as a Swine Flu preventive and remedy, a number of high-profile medical researchers and related experts have been recommending colloidal silver as a first-line of defense against the Swine Flu and other viral pandemics.

These include Dr Eric Gordon, MD, Dr. Kent Holtorf, MD, Dr. Sherry Tenpenny, DO, Major General Albert "Bert" N. Stubblebine III (former commanding general of the United States Army Intelligence and Security Command), Dr. Rima E. Laibow, MD, Dr. Leonard G. Horowitz, Dr Rebecca Carley (the vaccine expert) and many others.

#### **Dr. Gordon Pedersen Recommends Colloidal Silver**

Dr. Gordon Pedersen, Ph.D., an expert in toxicology and virology who is associated with the American Academy of Anti-Aging Medicine and is Director of the Institute of Alternative Medicine, has joined the ranks of those advocating for colloidal silver usage in the face of coming viral pandemics. [More](#)

In his new article, Swine Flu Influenza Type A/H1N1 Protection for Health Care Practitioners and Their Patients, published in the Anti-Aging News Journal, he repeatedly recommends silver to stop not only the virus itself, but also the secondary bacterial infections that cause diseases such as pneumonia, which set in after the body has been weakened by the virus. [Source](#)

*On the basis of the achieved results we may conclude that by application of colloidal silver water was achieved significant success in treatment of patients with mild urinary infection, and in combination with antibiotic in grave urinary infections. More In Kragujevac On May 25, 2007. Prof. dr Olgica Gajovic  
[Specialist in Infectious Diseases](#)*

The best defense against flu, is the age old remedy of colloidal silver. The metal silver in its colloidal state can be safely consumed and used in the body. Bacteria and viruses cannot develop resistance to colloidal silver. Silver disables a vital enzyme and mechanism in all bacteria and pathogens so that they cannot survive. It is good to take a few teaspoons of colloidal silver daily to maintain health. More colloidal silver should be taken if experiencing illness [Source](#)

" The best defense against swine flu, or any flu, is the age old remedy of colloidal silver. The metal silver in its colloidal state can be safely consumed and used in the body. Bacteria and viruses cannot develop resistance to colloidal silver. Silver disables a vital enzyme and mechanism in all bacteria and pathogens so that they cannot survive. It is good to take a few teaspoons of colloidal silver daily to maintain health. More colloidal silver should be taken if experiencing illness."

" No known disease-causing organism can live in the presence of even minute traces of the chemical element of metallic silver. [This includes destructive bacteria, viruses, and fungi which, when compared to antibiotics, is one of the things which makes silver unique: antibiotics are specific to bacteria and, in some cases, fungi, but never viruses-Ed.] From his bacteriological experiments with silver, Dr. Henry Crooks has concluded, 'I know of no microbe that is not killed in laboratory experiments in six minutes.'" (Cross referenced: Health Consciousness, Vol 15, No. 4, "Report: Colloidal Silver" Ref. 1, p. 34. This report also states that all microbes were killed "with a dilution of as little as

five parts per million, though there are no side effects whatsoever from higher concentrations.")

**Even Pravda, the top newspaper in Russia, recently recommended colloidal silver for the Swine Flu, [stating:](#)**

[More Scientific stuff](#)

University of Texas Colloidal Silver Effectiveness Study - This study conducted by the University of North Texas demonstrates the in-vitro effectiveness of a 15 PPM and a 30 PPM isolated colloidal silver product against a wide range of illness-causing bacteria.Source

Colloidal Silver Antibacterial Study - Microbiologists at Brigham Young University ( BYU ) - This time-kill study documents the effectiveness of silver as an antimicrobial substance. BYU Microbiologist Dr. Ron W. Leavitt concluded that a quality product may possibly serve as an antibiotic alternative.Source

Looking back at all the trouble and roadblocks the FDA and the pharmaceuticals companies have caused with regard to Colloidal Silver Products, perhaps it has worked out for the best. Even the EPA (Environmental Protection Agency)... they list no known toxicity level for Colloidal Silver, yet they have come up with a "safe" dose. It's important that these entities keep the fear and confusion alive because of the big money at stake.

Easy Instructions

120-240 Volts (The correct voltage is sent for your country)

#### [More Information](#)

### Multi-Pulsar V2

Totally Solid State Design,

High Quality Capacitors

Variable speed from 1 pulse to 75 pulses a minute. .

#### Colloidal Silver Generator

Bob Beck Type blood zapper

Bob Beck type magnetic pulser 6500-7000 gauss at 7 pulses per min

1-30 min Timer

Intensity Control

Double the penetration

You can hear the magnetic pulser pulse

Doesn't over heat after a short time
